

CLAIMSsub
A9

1. Thermoplastic composition comprising a thermoplastic polymer,
in which polymer is incorporated a crosslinked phase originating from the
5 reaction:

- of a product (A) comprising an unsaturated epoxide
- of a product (B) comprising an unsaturated carboxylic acid
anhydride
- of a product (C) comprising an unsaturated carboxylic acid or of
10 an α,ω -aminocarboxylic acid.

2. Composition according to Claim 1, in which the product (A) is
an ethylene/alkyl (meth)acrylate/glycidyl (meth)acrylate copolymer.

3. Composition according to Claim 1 or 2, in which the product (B)
15 is an ethylene/alkyl (meth)acrylate/maleic anhydride copolymer.

4. Composition according to any one of Claims 1 to 3, in which (C)
20 is an ethylene/alkyl (meth)acrylate/(meth)acrylic acid copolymer.

5. Composition according to any one of the preceding claims, in
which the thermoplastic polymer is chosen from polyamides and saturated
polyesters.
